10.30 A.M. 18 FEBRUARY 1994

## **ECONOMIC INDICATORS, QUEENSLAND, FEBRUARY 1994**

### **MAIN FEATURES**

- During January the \$A appreciated 6.3% on a trade weighted index against the currencies of Australia's major trading partners, by 3.0% against the Japanese yen and by 5.0% against the \$US. The provisional trend estimate for the December 1993 current account deficit was \$1,430m, an increase of \$64m, or 5% on the provisional trend estimate for November 1993. This was the fourth consecutive monthly rise in the deficit. A major factor in the deficit was an increase in imports and decrease in exports.
- Queensland's main economic indicators continue to point to continued growth in the Queensland economy. In trend estimate terms, for the 12 months ending September quarter 1993, Queensland's state final demand increased 5.6% from \$16,202m to \$17,109m. Over the same 12 month period the trend estimate for gross fixed capital expenditure increased 8.2%.
- The all groups Brisbane CPI increased 0.3% between the September and December quarters 1993, resulting in an annual increase (December quarter 1993 on December quarter 1992) of 1.9%. The Brisbane price index for materials used in house building decreased 0.4% from October to November 1993. This was the first decline recorded since September 1991.
- The trend estimate for retail turnover in Queensland has recorded relatively strong growth since July 1993, although the November and December 1993 increase of 0.9% and 0.8% respectively, indicate a slight easing of growth in retail activity.
- Total dwelling unit approvals, in trend estimate terms, in Queensland remained relatively stable between November 1993 and December 1993 but were 16.2% higher for the year ending December 1993. The value of all buildings approved has increased 62.9% in the 12 months from December 1992 to December 1993.
- The finance sector remains considerably stronger than the corresponding period in 1992. In the 12 months November 1992 to November 1993, housing finance for owner occupation increased 21.9%, total personal finance commitments 12.7% and lease finance commitments 26.1%.
- The January 1994 Queensland labour market indicators continue to show signs of improvement. The trend estimate unemployment rate fell for the fourth consecutive month. In January 1994, it was 10.3% compared with 10.7% in January 1993. The total number of employed persons, trend estimate, has risen from 1,362,200 in January 1993 to 1,409,900 in January 1994, an increase of 3.5%.

Statistics shown in this publication are the latest available at the date of preparation. In a number of cases, figures appearing in this summary are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue, or to the statistical publication on the specific subject when figures are not shown.

Current publications produced by the Australian Bureau of Statistics (ABS) are listed in the *Catalogue of Publications*

and *Products* (1101.0). The ABS also issues the *Publications Advice* (1105.0) on Tuesdays and Fridays which lists publications to be released in the next few days. Both the *Catalogue* and the *Publications Advice* are available from any ABS office.

For detailed explanatory notes and definitions for the items shown in this publication, readers are referred to the specific publications which are listed in this issue.
